

Program Description:

The A.S. in Radiography prepares you as a skilled professional radiographer through a curriculum that includes both classroom and clinical instruction. As a student in this technology, you are educated in utilizing X-ray equipment and techniques, proper patient positioning, radiation protection methodologies, and quality patient care. As a member of the medical imaging team, the radiologic technologist produces quality, diagnostic images that are interpreted by a radiologist, a physician who specializes in medical imaging. As a radiographer, you may find employment in hospitals and clinics, physician's offices, government and industrial facilities, and medical laboratories. The SFSC Radiography program is accredited by the Joint Review Committee on Education in Radiologic Technology.

Length: 77 credit hours
