

Attachment G -Compressor /Electrical Room

This section will house the:

- Air Compressor (with a drain tube to the outside)
- Transformers
- Breaker boxes
- Switching gear for the Shore Power

This room should have an access way to get the equipment out if it was to need to be replaced.

There should be adequate ventilation in the ceiling to vent the heat

Must have adequate air inlet for the fans to prevent a vacuum effect

Doorway to Welding Booth Section see—Attachment H
